We Build the Machines That Power Industry

Since 1965, Hitachi Global Air Power is a global leader in compressed air solutions, helping manufacturers and industrial operators power their operations with reliable, efficient, and sustainable technologies. Backed by the strength of Hitachi and more than 60 years of compressed air expertise, the company combines advanced engineering, global manufacturing capabilities, and customer-focused innovation to address the evolving needs of industry.

Through its trusted brands – Hitachi, Sullair, and Champion (Australia) – Hitachi Global Air Power delivers a comprehensive portfolio of compressed air solutions for customers in manufacturing, food and beverage, pharmaceuticals, energy, construction, mining, gas compression, infrastructure, and other critical industries.

Offerings include:

- Industrial air compressors, including oil flooded and oil free technologies
- Portable air compressors for rental, construction, mining, infrastructure and industrial applications. Offerings include oil flooded, oil free, and electric options.
- Compressed air solutions and components for packaging, drilling, and gas compression applications
- Air treatment equipment, including refrigerated and desiccant dryers, filtration, and mist elimination systems
- Aftermarket products and services, including Genuine Sullair Parts and premium lubricants
- Digital solutions, featuring AirLinx® remote monitoring and managed air power services
- Custom compression applications and skid-mounted systems

With manufacturing operations in Michigan City, Indiana, USA, and Suzhou, China, as well as a joint venture operation with IHI-Sullair, Hitachi Global Air Power serves customers around the world with localized expertise and global scale. As part of Hitachi Industrial Equipment Systems Co., Ltd., a wholly owned subsidiary of Hitachi, Ltd., the company is focused on helping customers improve productivity, increase energy efficiency, and support their sustainability objectives through advanced air power technologies and connected solutions.

Building a SUSTAINABLE FUTURE

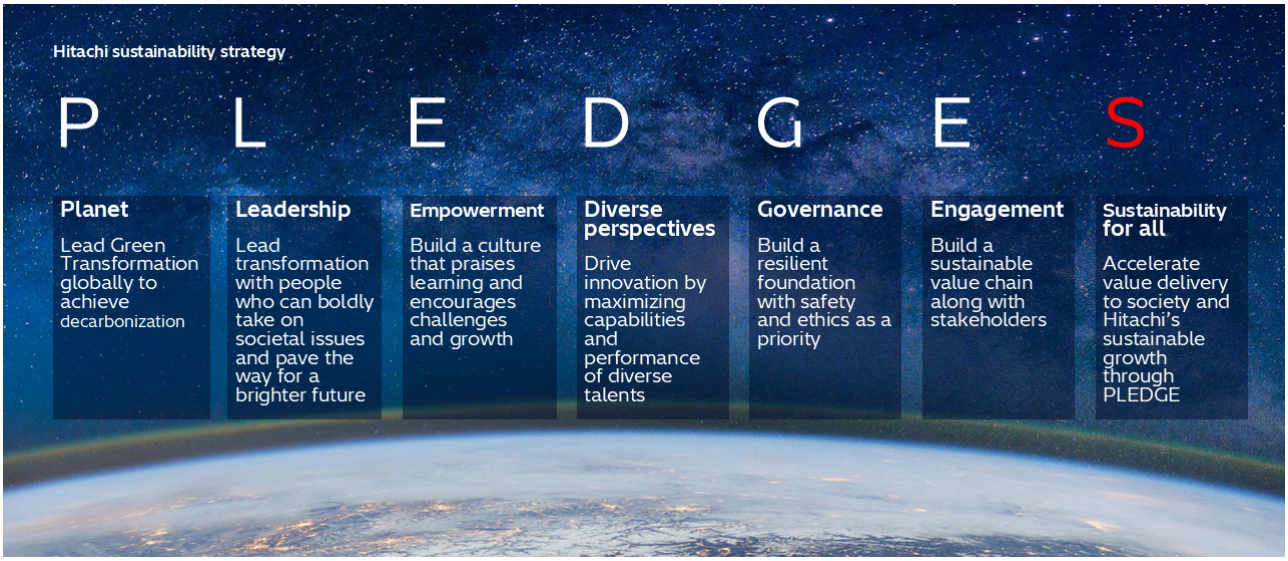

Sustainability Through Innovation

Guided by Hitachi's global sustainability vision, we focus on three priorities: decarbonization, circular economy practices, and nature-positive initiatives that help create long-term value for customers, communities, and the environment.

At Hitachi Global Air Power, we bring these priorities to life through remanufacturing and reuse programs and continuously innovating to help customers reduce energy consumption and improve operational performance. Through responsible manufacturing, data-driven improvements, and ongoing investment in technology, we are building sustainability into our products, operations, and the industries we serve.

Our PLEDGES for the future

Hitachi launched its new group sustainability strategy PLEDGES, which include our commitment, aspirations, and targets for sustainability.

Sullair Certified REMAN

Sullair Certified REMAN helps customers maximize the value of their equipment by restoring portable air compressors to OEM standards, delivering better-than-when-new performance, improved reliability, and extended service life at a lower cost than purchasing new equipment. By extending the lifecycle of existing equipment, Sullair Certified REMAN also supports sustainability goals by reducing waste and maximizing the value of resources already in service.

Go-To-Market & CUSTOMER SUPPORT

Company-Owned Service Network: Hitachi Air Centers

Hitachi Air Centers are Hitachi Global Air Power's company-owned sales and service locations, providing localized expertise and comprehensive compressed air sales, installation, and service throughout the United States. Services include preventive maintenance, 24/7 emergency service, air audits, equipment repair and refurbishment, fluid analysis, and system optimization. Backed by the resources and innovation of Hitachi Global Air Power, Hitachi Air Centers help customers maximize uptime and operational efficiently while delivering responsive, local support.

Independent Distribution Network

Hitachi Global Air Power also serves customers through a broad network of independent authorized distributors. These partners provide sales, service, technical expertise, and aftermarket support across North American and around the world ensuring customers have access to compressed air solutions wherever they operate.

HITACHI

LEADERSHIP TEAM

Hideki Fujimoto

Hideki Fujimoto, President and CEO of Hitachi Global Air Power, brings extensive experience in leadership, engineering, and innovation development. Fujimoto formerly served as Deputy Group Executive of the Global Air Power division at Hitachi Industrial Equipment Systems. Throughout his 20-plus year tenure at Hitachi, Fujimoto has assumed increasing responsibility, including serving as Vice President Engineering at Hitachi Global Air Power.

Fujimoto received a Master of Engineering from Kanazawa University in Ishikawa, Japan and a Bachelor of Engineering - Mechanical Engineering.

Michael Guido

Michael Guido, Chief Financial Officer, has more than 30 years of financial and engineering experience in numerous industrial, consumer, medical and aerospace businesses. Prior to joining Hitachi Global Air Power, Guido was vice president for the air frame systems division at Woodward, where he had P&L responsibility for $500 million in global sales. Guido previously held numerous leadership financial positions with Integra Lifesciences, Danaher and Stanley Works and several engineering roles at General Electric.

Guido received a Master of Business Administration from Vanderbilt University, and a Bachelor of Science in Engineering from Duke University.

Jessica Bailey

Jessica Bailey, Chief Human Resources Officer, Hitachi Industrial Equipment Systems, is responsible for the strategic coordination and implementation of global human resources systems, processes, policies, and programs at Hitachi Global Air Power. Bailey brings 18 years' experience in human resources and, prior to joining Hitachi Global Air Power, served as the HR Manager for Calumet Abrasives and HR Business Partner at Robert Morris University and Menards.

Bailey received a Bachelor of Science in Human Resources from Purdue University.

Tom Poczekay

Tom Poczekay is Vice President Engineering, and General Manager Global New Product Development at Hitachi Global Air Power. With more than 30 years of engineering and leadership experience, he leads product innovation and engineering strategy across the organization. Prior to joining Hitachi Global Air Power, Poczekay held senior engineering and manufacturing leadership roles at Revcor, Gardner Denver, and Universal Blower Pac, Inc.

Poczekay received a Master of Business Administration and a Bachelor of Science degree in Mechanical Engineering from Purdue University.

HITACHI

LEADERSHIP TEAM

Joe Beyer

Joe Beyer is Senior Vice President, Sales, North America, responsible for sales of all Hitachi Global Air Power stationary products in the Americas. Prior to joining Hitachi Global Air Power, Beyer was Vice President Sales MIM&E Extrusion at Milacron, a plastics injection and extrusion molding machine manufacturer in Cincinnati, Ohio. Additionally, Joe has more than 20 years of experience in the compressor industry.

Beyer holds a Master of Business Administration from Ohio State University Fisher College of Business, and a Bachelor of Science in Mechanical Engineering from Ohio University.

David Andrews

David Andrews, Vice President, Global Marketing and Communications, is responsible for global marketing and communications strategies and efforts, and global product management for the Sullair brand. Andrews brings more than 35 years' experience and previously held roles with Sara Lee, McCain Foods, BP Amoco, Nestle, Assurant Health, and DeLaval.

Andrews received a Master of Business Administration from Kellogg School of Management at Northwestern University and a Bachelor of Arts in Journalism/Public Relations from Creighton University.

Todd Rozar

Todd Rozar, Vice President Portable Sales, is responsible for leading the Sullair portable and OEM sales strategy for North America. Rozar brings more than 20 years of experience in management and air compressor sales. Prior to joining Hitachi Global Air Power, Rozar served as Vice President of Business Development at Atlas Copco.

Rozar received a Bachelor of Arts in Political Science and Government from The University of Georgia and completed the International Management Program at the Stockholm School of Economics.
