

The Future of Industrial Operations Through Physical AI

Hitachi Ltd.'s Connective Industries sector brings together a broad portfolio of companies and capabilities, including Hitachi Global Air Power, Hitachi Industrial Equipment & Solutions America, and Telesis Technologies, to help industrial customers achieve smarter, more connected, and more efficient operations.

By combining operational data, AI capabilities, and reliable industrial equipment, Hitachi helps customers:

- Reduce downtime
- Improve efficiency and sustainability
- Increase productivity and operational performance
- Enhance quality assurance
- Make better data-driven decisions

HMAX™ Industry is part of Hitachi's suite of AI-powered solutions that advance safety, productivity, quality, and environmental sustainability in buildings and factories, driving innovation for frontline workers, and improving people's well-being.

By combining data from physical equipment, sensors, and digital systems with Advanced AI and Hitachi's deep industry expertise, HMAX helps organizations improve operations, solve complex challenges and make better decisions.

Hitachi Global Air Power

Hitachi Global Air Power is a leading manufacturer of industrial compressed air solutions, delivering the air power that keeps manufacturers operating around the world. Through its trusted Sullair and Hitachi compressor brands, Hitachi Global Air Power provides reliable, durable, and energy-efficient technologies that support critical applications from food and beverage, and pharmaceuticals, to electronics, semiconductors, automotive, and more.

Telesis Technologies

Telesis Technologies is a global leader in permanent marketing and traceability technologies, helping manufacturers ensure product quality, compliance, and lifecycle visibility.

- Laser and dot peen marking solutions
- Product identification and serialization
- Traceability and quality assurance solutions
- Manufacturing data integration
- Compliance and lifecycle tracking
